Dear IFLRY President,

It is a pleasure to get in touch with you. As member of our national liberal political party, (**MPD/Liggey, Mouvement des Patriotes pour le Developpement**) and Chairperson of students branch, I'm highly honored to inform you that all the students members of our party really get involved about "liberalism political ideology" after many seminars organized by Professor Aliou SOW, who is the national President. We are also filling all prospective membership rights and obligations to join IFLRY in a couple of weeks in order to be able to attend all national and international meetings. The party is already in partnership with the Friedrich Naumann Foundation.

Members of students coordination called CEEP (**Coordination des Elèves et Etudiants Patriotes**), senior civil structure and others branches linked to MPD/Liggeey are devoting to promote in all Senegalese constituencies our leader's liberal ideology and principles so much so that our party becomes the real liberal ruling one in the future.

As far as Professor Aliou SOW, himself, is concerned, he is a former IFLRY Vice-President, Member of Parliament at the age of twenty five, Minister at twenty seven, Mayor, UJTL national leader (Secretary General), to list but a few.

As for me, I have already defended my Masters degree dissertation in African studies (Cheikh Anta Diop University) at the end of which I ended up as a top student of the year at English department. I'm applying for my Ph.D in Communication, Rhetoric, and Digital Media (CRDM) at North Carolina State Graduate School (USA).

Sincerely Yours,

Samsoudine
